Technical Notes

Data sources:

Behavioral Risk Factor Surveillance System (BRFSS)

Prevalence data for current smokers is from Behavioral Risk Factor Surveillance System (BRFSS). Data for 2011 and 2012 was pooled (combined) in order to get reliable estimates for most counties. Due to methodological changes in 2011 BRFSS, estimates from 2011 BRFSS going forward cannot be compared to BRFSS estimates from 2010 and earlier.

Current smokers were defined as persons who reported smoking at least 100 cigarettes during their lifetime and who, at the time of survey, reported smoking every day or some days.

Nevada Central Cancer Registry

Cancer data is from Nevada Central Cancer Registry for the period 2006-2010. The following cancers listed by the American Cancer Society (ACS) as tobacco-related were used:

- Lung cancer
- Lip, oral cavity and Pharynx
- Larynx
- Esophagus
- Stomach
- Pancreas
- Kidney and Renal Pelvis
- Urinary bladder
- Cervix (Cervix uteri)
- Colorectal
- Ovary
- Leukemia (ACS lists acute myeloid leukemia, however, all Leukemia cases were used)

Hospital Inpatient Billing

Hospitalization data is from 2012 Hospital Inpatient Billing as of 06-05-2013. Data for primary diagnosis for the following respiratory diseases were used:

- Chronic Obstructive Pulmonary Disease (COPD) – ICD-9-CM codes: 491.0, 491.1, 491.20, 491.21, 491.8, 491.9, 492.0, 492.8, 494, 494.0, 494.1, and 496.
- Bronchitis – ICD-9-CM codes: 466.0 and 490 (primary diagnosis) and accompanied by a secondary diagnosis of COPD.
- Cardiovascular conditions in the primary diagnosis – ICD-9-CM codes: 410-414.99 and 420-438.99.
- Tobacco-related cancer in any of the thirty three diagnoses codes– ICD-9-CM codes: 140-151.99, 153-154.19, 157-157.99, 160-162.99, 180-180.99, 188-189.19, 205-205.22, and 183.0.

Mortality

Mortality data is from Nevada Vital Records death files. Data for 2006-2010 was used for tobacco-related deaths. The following tobacco-related illnesses were used:

Malignant neoplasms – ICD-10 codes: C00-C14, C15, C16, C25, C32, C33-C34, C53, C64-C65, C67, and C92.0.

- Cardiovascular diseases – ICD-10 codes: I20-I25, I00-I09, I26-I51, I60-I69, I70, I71, and I72-I78.
- Respiratory diseases - ICD-10 codes: J10-J18, J40-J42, and J44.

Smoking attributable mortality percentages that were applied the above tobacco-related illnesses are available at: [http://www.state-](http://www.state-epi.org/document/audiopresentations/ICD9_10_codes_tobacco_mortality_attributable_fractions.pdf)
